entity compact charging

When you choose the GARO entity compact chargepoint, you have not only made a sustainable and environmental smart choice, but you can also feel secure that it is the one of the safest charging points on the market. The chargepoint contains all built in protections and it is rigorously tested to cope with all climates. The chargepoint is independently certified and meets all European electrical and safety standards. The chargepoint can easily balance the load, which means that the charging rate is managed around your other electricity consumption so you don't have to worry about the main fuse tripping.

A close-up photograph of a person's hand, wearing a black jacket, interacting with a charging station. The hand is touching a black, textured panel on a grey charging unit. The unit is mounted on a light-colored wooden wall. A green vertical line is visible on the left side of the unit. The person is wearing a gold ring and a silver ring on their fingers.

GARO CONNECT APP *Smart & future-proofed Charging Software*

GARO Connect is a joint app for both you as the owner, or electrical installer, other family members and guests. In the app, you can easily schedule when you want the car to be charged, by time or electricity price, and stop or start your charging remotely. Via the app, it is also possible to see how much your car is charging in real time and you can also choose to receive notifications if your charging has been paused due to your other electricity consumption in the household consuming too much electricity at a certain time.

Features of GARO CONNECT

- ✔ Stop and start charging remotely
- ✔ Schedule your charging according to how you want your car to charge during the day.
- ✔ Schedule your charging according to when the car should be fully charged.
- ✔ Schedule your charging according to electricity price.
- ✔ Invite more users to use the charging box
- ✔ See how much the car charged in real time
- ✔ Find nearby and available GARO entity chargers that you own or are users of.

Extra Freedom with GARO CONNECT APP

With GARO Connect, everything is gathered in one and the same place. If you have several charging boxes at home, you can manage and control them all via GARO Connect. There is an unlimited number of users that can be added to a single app, allowing multiple family members and guests to use the app. Clearly accessible and user-friendly for all users.

Smart Price Adaption.

Together with the GARO connect app, the concept of charging smart reaches a new level. With smart price adaption, your car is charged automatically when the electricity price is at its lowest during the day. In this way, you lower your electricity bill and you will get a cost effective solution.

Charge on your terms.

When you use the GARO ENTITY compact together with the app, you decide who charges and when, this means that no unauthorised person can access your charging box. You can easily add or remove users via the app. It is also not possible to interrupt the charging because the cable is automatically locked in the car when they are connected to each other and the car is locked. You can also link a tag to a user. The tag is ordered separately, but also certain RFID tags that you have had before can be used to identify you as a user. You make the connection between tag and user easily in the app.

A photograph of an electric vehicle charging station at sunset. The station is a dark, vertical structure with a charging cable hanging from it. The background shows a blurred landscape with trees and mountains under a warm, orange sky. The front grille of a car is visible in the bottom left corner.

**Charging
the future.**

#pluggingintothe future

We always ensure that future technology developments can be implemented in GARO products. An electric car charger from GARO is a future-proof choice with reliable knowledge and support on hand.
